SHIMADZU ELECTRONIC BALANCES

SHIMADZU : A Tradition of Weighing Expertise

Shimadzu Corporation was established in 1875 in Kyoto, Japan, as one of the pioneers of scientific precision instruments.

Top-pan and torsion balance production started in 1918, and equal-beam analytical balances were introduced in 1925. Since their release, the continuous improvement of Shimadzu balances has contributed to research and development across all industries.

Around the turn of the 20th Century, precision weighing was a time-consuming practice performed only by experienced operators. Placing the sample and small masses on pans hung from a beam scale with a moving indicator was a tedious process. Shimadzu strove continuously to streamline weighing procedures. The introduction of the direct reading analytical balance (patented in Japan in 1948) signified a new era in weighing technology. In the Type L balance, the sensitive mass-loading work was replaced by convenient dial operations. Users reduced weighing time by 66%, and consequently reduced demand for conventional balances.

Shimadzu then added the top-loading direct reading balance with Roberval's mechanism in 1959. Until recently many of these instruments were still utilized in modern laboratories.

Shimadzu continued to pioneer new technologies, releasing its first electronic balance in 1971-the Digibalance.

This release marked a milestone in precision weighing, introducing simplicity and ease of use to analytical weighing. Six years later (1977), the application of microprocessors in electronic balances further enhanced weighing performance. The compact ED Series provided substantial improvements in sensitivity, resolution, and stability.

More recently, Shimadzu has introduced user-friendly instruments and features to the market, such as : the temperature-based fully-automatic calibration in 1985, the first one-piece forcecell (OPF, later renamed UniBloc) in 1989, the high-sensitivity AEM-5200 Micro Balance in 1993, and the unique WindowsDirect feature perfectly suited for the computerized laboratory of the 21st Century.

Moving forward, Shimadzu is committed to providing innovative products for the analytical marketplace.

One of the latest achievements is AUW-D series, the world's first semi-micro balances with the advantages of UniBloc one-piece forcecell technology.

Features and Symbols

REDUCE MANUAL CALIBRATION WORK

Perfect Self Calibration

The balance self-calibrates when it detects temperature changes that would affect accuracy. Operator is released from constantly monitoring surrounding conditions.

Clock-CAL

Fully automated feature initiates self-calibration at set time intervals, using motor-driven internal calibration weight. Up to three automatic calibrations per day may be pre-set to coincide with work schedules or to meet specific quality goals.

Internal Calibration

Calibration can be performed any time with a simple push-button operation.

One-lever CAL

Single lever operation loads and unloads built-in calibration weight.

GLP, GMP, AND ISO9000 CONFORMANCE

Calibration Report

With optional printer connected to the balance, calibration reports which meet the requirements of GLP, GMP, and ISO9000 can be produced.

Built-in Clock

Date and time can be readily supplied by the balance.

APPLICATION SPECIFIC FEATURES

WindowsDirect (See p.9)

Weighed result is directly typed at the cursor position of any application on Windows® OS. No communication software is required.

Built-in RS-232C Interface

RS-232C interface is a standard feature.

All that you need to add is **just one cable!**
No communication software is required!

If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Piece Counting Mode

Piece counting function is a standard feature.

Analog Bar Graph Display

Allows viewing of remaining capacity.

Specific Gravity Measurement

Software for specific gravity measurement is pre-installed. Simply add optional specific gravity kit for efficient measurements.

Standard Below-weigh Hook

Measurement beneath the balance is possible.

Interval Timer Output

Data can be automatically output at pre-set time intervals.

Auto Print

Data can be automatically output as each measurement is made.

Checkweighing

Utilized in quality control applications.

Dry Battery Operation

Portable for use in the field.

OTHER FEATURES

UniBloc

Single-block technology brings high performance and durability.

Backlight

Easy to read in any environment.

All-metal Housing

All metal construction for high durability.

Easy Setting

Best fit to weighing application

Menu Operation Key

Easy to operate key layout

UniBloc Analytical Balances

AUW-D series dual-range semi-micro balances
 AUW/AUX/AUY series analytical balances

Excellent Weighing Performance

- Compact UniBloc mechanism and digital processing technology produce fast response and stability at the same time.
- Microprocessor digital control can be set to automatically provide the most suitable data processing for the installation environment and weighing application.

User-friendly Features

- Weighing work is made easy by the smooth door movement. It is easy to remove and replace the door rails for cleaning.
- The embossed key panel sheet provides clear clicking response as operated. The key operations can be confirmed with a gentle beeping sound, too.
- Level adjustment can be performed with ease.

For Application

- Shimadzu's unique WindowsDirect is a standard feature for all the UniBloc Analytical Balances. Measurement results can be transmitted to Excel or other Windows applications without any software installation to your computer. All you have to add is one RS-232C cable.
WindowsDirect works with Windows® 95, 98, NT4.0, 2000, ME and XP. PC must be IBM PC/AT compatible.
- Piece counting, various mass units, below-weigh hook, specific gravity measurement software are all standard features.

UniBloc Family of Balances

Shimadzu introduced one piece force cell technology for precision balances in 1989. Today's UniBloc is created by high-precision electric discharge wire processing applied to a block of aluminum alloy, and replaces the conventional electro-magnetic balance sensor assembly. UniBloc's compact, uniform structure ensures stable temperature characteristics, excellent response time and stable corner-load performance. The UniBloc design permits a consistency of production that assures reliability and a long operational life. The updated UniBloc technology expanded the UniBloc balance line up, which now ranges from semi-micro with minimum display of 0.01mg to precision platform balances up to 52kg in capacity.

One piece force cell patented in USA in 1989, No.4799561, in China in 1991, No.12729, in Japan in 1995, No.1905686

Dual-range semi-micro balances

A UW-D dual-range semi-micro balances are the first five-decimal balances with the advantages of UniBloc one-piece force cell technology.

Choose one of the two models according to your field requirements.

Excellent response, stability and zero return performance – in a semi-micro balance.

Choice of fully-automatic calibrations : PSC and Clock-CAL

Operator can choose from two types of fully-automatic span calibration methods. "PSC" is initiated based on temperature change detection, and "Clock-CAL" operates at user pre-set times (up to three times a day).

GLP/GMP/ISO calibration report

Calibration report can be automatically printed out with the optional electronic printer. Date and time are also output to meet GLP/GMP/ISO requirements.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required. If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

UniBloc Analytical Balances

Analytical Balances

AUW/AUX/AUY Series

AUW/AUX/AUY models are the single-range analytical balances engineered with the UniBloc technology. This provides especially fast response and superb stability.

PSC, fully-automatic calibration (AUW/AUX models)

Calibration is carried out when temperature change has been detected.

Clock-CAL, fully-automatic calibration (AUW model only)

Calibration carried out at user-preset times (up to three times a day). Operators can work without unexpected interruptions.

GLP/GMP/ISO calibration report (AUW/AUX models)

Meets requirements of GLP/GMP/ISO9000. Calibration reports can be output with date and time, provided by the built-in clock.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required. If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Backlight LCD (AUW model only)

LCD with backlight can be read with ease and comfort under any lighting condition.

Data transfer port of AUW/AUX/AUY Series

UniBloc Family of Balances

Analytical Balances

ATX/ATY Series

New

ATX

New

ATY

High specification and low cost with UniBloc.

Touch-key calibration

Automated calibration can be started by pressing keys. (ATX series)
Also, your external calibration weights can be used for span calibration. (All models)

Easy Setting Best fit to weighing application

Quickly adjust the desired ratio of stability and response for every application, even during measurement, with one-touch operation.

Expanded Piece Counting function

Unit weights of up to 5 different samples can be easily entered, stored and recalled for use.

Comparator function

Compare samples to target values or pass/fail criteria and clearly indicate the results.

Formulation mode

Convenient for making many measurements of minute samples and seeking the total mass.

WindowsDirect Communication Function

Send balance data to Excel or other Windows applications without any data communication software installation required. By combining standard AutoPrint functions with typical spreadsheet functions, even difficult applications can be easily automated
*IO-RS cable is needed.

Very large size pan

It enables the use of a large flask. (91 dia)

Data transfer port of ATX/ATY Series

UniBloc Top-Loading Balances

Top-Loading Balances

UW/UX Series

- UW**              
- UX**           

New Line up!

UW820H/UW1020H
UX820H/UX1020H

The new line of Shimadzu top-loading balances are engineered with the UniBloc mechanism resulting in unrivaled response, stability and durability. Powerful features support any imaginable weighing application. UW Series includes internal calibration and fully-automatic calibration functions.

Large-pan model

Small-pan model
(minimum display 0.01g)

Small-pan model
(minimum display 0.001g)

* The delivered windbreak may differ from the photo

GLP/GMP/ISO calibration report

Meets requirements of GLP/GMP/ISO9000. Calibration reports can be output with date and time, provided by the built-in clock.

Example of calibration record

Analog display modes

Bar graph display

Bar graph clearly indicates the total weight (including the tare) as a portion of the balance capacity.

Target weighing

Select a target weight and tolerance. The display clearly indicates when they are reached.

Checkweighing

Set an upper and lower threshold. The display continually indicates whether the sample is within the range "GO", over range "HI" or under range "LO". Choose one of two checkweighing bar graph display modes.

The results can also be output to external devices.

PSC, fully-automatic calibration (UW only)

Calibration is carried out when temperature change has been detected.

Clock-CAL, fully-automatic calibration (UW only)

Calibration carried out at user-preset times (up to three times a day).

Operators can work without unexpected interruptions.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required. If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Auto Print

Automatically outputs data as each measurement is made. Combination with WindowsDirect makes up a handy weigh-and-record system.

Auto Print and WindowsDirect

All that you need to add is **just one cable!**

No communication software is required! Available as standard with AUW-D/AUW/AUX/AUY, ATX/ATY, UW/UX, TW/TX/TWC/TXC/TXB, BW-K/BX-K series, MOC-120H, MOC63u

If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Back light LCD

LCD with back light can be read with ease and comfort under any lighting condition.

Unit conversion and piece counting function

Weight value can be presented in 22 different units and modes, including percentage, carat, specific gravity, lb, oz, and others. Users can pre-register any combination of units depending on their needs. Piece counting function is standard.

UniBloc Top-Loading Balances

Top-Loading Balances

TW/TX/TXB Series

TW/TX series only

TW									
TX									
TXB									

The beginning of the new standard.
Extremely capable, but easy to operate.

Internal Calibration (TW series only)

Calibration can be performed any time with a simple push-button operation.

Easy Setting

Easy Setting Best fit to weighing application

Quickly adjust the desired ratio of stability and response for every application, even during measurement, with one touch operation provided by the built-in clock.

Menu Operation Key

Menu Operation Key Easy to operate key layout

Menu navigation keys are separated from weighing operation keys and arranged in a familiar 5-way navigation circle. Up, Down, Right, Left and Enter are the simple steps of menu operation.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required.

If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Can be used anywhere with battery power (TXB only)

Battery power the TXB series balances by AC adapter or batteries.

Power saving function

If you don't operate for a given length time, power (TXB) or display (TX) can be turned off automatically.

UniBloc Family of Balances

Jewelry & Gold Balances

TWC/TXC/TW/TX/TXB Series

Weighing gold in a local unit

Various weighing units including Tael (Hong Kong, Taiwan, Singapore, Malaysia, China) plus user-defined unit are available.

Counting coins or parts

Piece counting function is standard.

Pass/fail checkweighing

According to the user-preset thresholds, GO (pass), HI (over) or LO (under) will be displayed.

Production/sales management using computer

WindowsDirect function directly types the weighed results to any Windows application you are using (e.g. Excel) without interface software required. (TX series)
If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Internal Calibration (TW/TWC series only)

Calibration can be performed any time with a simple push-button operation.

Battery operation (TXB)

TXB may be operated with dry batteries. Suitable for sites where reliable power supply is not available.

*1 If you need PSC or timer calibration, please select UW series.

*2 If a second display is required, please select UX/UW series.

Data transfer port of TWC/TXC/TW/TX Series

UniBloc Precision Platform Balances

Precision Platform Balances

BW-K/BX-K Series

- BW-K**         
- BX-K**         

The Shimadzu Precision Platform balances have been engineered with the innovative UniBloc mechanism since 1989. Powerful features support any imaginable weighing application. BW-K Series includes internal calibration weight.

BW-K Series

GLP/GMP/ISO calibration report

Meets requirements of GLP/GMP/ISO9000. Calibration reports can be output with date and time, provided by the built-in clock.

Data transfer port of BW-K/BX-K Series

Analog display modes

Bar graph display

Bar graph clearly indicates the total weight (including the tare) as a portion of the balance capacity.

Target weighing

Select a target weight and tolerance. The display clearly indicates when they are reached.

Checkweighing

Set an upper and lower threshold. The display continually indicates whether the sample is within the range, "GO"; over range, "HI"; or under range, "LO". Choose one of two checkweighing bargraph display modes.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required.

If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Large-size calibration weight (BW-K only)

For accurate internal calibration. Calibration can be performed by simple lever operation.

Model	Capacity	Minimum display	Pan size(mm) approx.	Calibration weight
BW12KH	12kg	0.1g	345X250	Built-in
BW22KH	22kg	0.1g	345X250	Built-in
BW32KH	32kg	0.1g	345X250	Built-in
BW32KS	32kg	1g	345X250	Built-in
BW52KS	52kg	1g	345X250	Built-in

Model	Capacity	Minimum display	Pan size(mm) approx.	Calibration weight
BX12KH	12kg	0.1g	345X250	External
BX22KH	22kg	0.1g	345X250	External
BX32KH	32kg	0.1g	345X250	External
BX32KS	32kg	1g	345X250	External
BX52KS	52kg	1g	345X250	External

Analytical Balances

Analytical Balances

AW/AX/AY Series

Fully-automatic calibration; PSC (AW only)

Calibration is carried out when temperature change has been detected.

Clock-CAL function (AW only)

Calibration carried out at user-preset times (up to three times a day). Operators can work without unexpected interruptions.

GLP/GMP/ISO calibration report

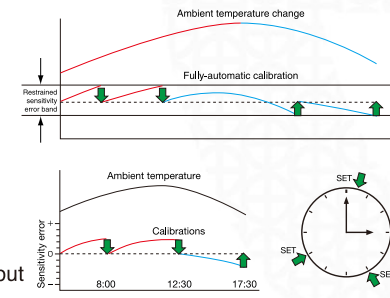

Meets requirements of GLP/GMP/ISO9000. Calibration reports can be output with date and time, provided by the built-in clock.

WindowsDirect (See p.9)

Weighed data can be directly typed into any Windows application and no interface software is required. If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Unit conversion

Automatic unit conversion at the push of a button. Carat, and other units are standard.

Data transfer port of AW/AX/AY Series

Top-Loading Balances

BL Series

High-resolution balances made affordable

Large-pan model

Small-pan model

Small-pan model with windbreak

BL3200HL

Quick response

Very fast response for operator comfort and efficiency.

Piece counting function

Piece counting function is standard.

Analog bar graph display

Remaining weighing capacity can be seen at a glance.

Compact body

This electro-magnetic precision balance is as compact as a portable scale.

Data transfer port of BL Series

Model	Pan type	Capacity	Minimum display	Pan size(mm) approx.
BL220H *	Small-pan	220g	0.001g	100X100

BL3200S	Large-pan	3200g	0.1g	164X124

*Models with minimum display of 0.001g come with a standard windbreak.

Portable Electronic Balances

Portable Electronic Balances

ELB Series

Optional battery operation makes it readily portable with no compromise in accuracy.

High sensitivity and stability

Improved internal resolution provides extra accuracy.

Quick response

Stable results are quickly displayed.

Various application modes

Piece counting, percent display, and specific gravity modes are easily accessible.

Standard specific gravity software

Optional specific gravity kit is available for extra efficiency.

Digital stability control

User-selectable parameters for high-vibration environments provide dependable results.

Two-way power supply (AC or Battery operation)

Battery operation makes it portable

Model	Pan type	Capacity	Minimum display	Calibration weight

ELB12K	Large-pan	12,000g	1g	170X130

Data transfer port of ELB Series

Totally portable

This whole system can be operated with dry batteries.

Application Balances

UniBloc Electronic Moisture Balance

MOC-120H

Large sample pan and capacity allow any sample to be placed for the best drying conditions.

Reliable UniBloc weighing mechanism and unique continuous auto-tare system assure accurate measurements.

Large sample pan and continuous auto-tare mechanism

A larger sample pan contributes to accurate measurements, but the larger heat capacity of it normally results in a larger zero drift in the precision weighing.

The MOC-120H is equipped with a unique continuous auto-tare mechanism, which eliminates the zero drift continuously and ensures high accuracy, even with a larger sample pan.

UniBloc technology for precision weighing

Shimadzu's UniBloc cell is used as the core mechanism of the weighing part.

Its uniform structure maintains the high performance of precision weighing under repeated heating / cooling.

Mid-wave infrared quartz heater

Mid-wave infrared quartz heater provides effective drying for a wide range of samples. Besides the excellent drying performance, it offers a long operational life of 20,000 to 30,000 hours.

Therefore, the long-term operational cost is much lower than halogen lamp heaters.

Predictive measuring mode

The final result can be predicted from the drying process, saving time in repeated measurements.

WindowsDirect

Complete sample data and instrument settings can be directly typed into any application on Windows® and no interface software is required.

If you'd like to use "WindowsDirect" with "Windows 7" "Windows VISTA", or USB port, please contact to our distributors.

Dimensions

MOC-120H with 130mm sample pan

Data transfer port of MOC-120H

Measuring method	Heat drying and weight loss
Sample pan size	130 mm dia
Sample pan material	Stainless steel
Minimum display in weighing	0.001g
Measurement range of moisture content	0.01% to 100.00 %
Moisture content minimum display	0.01%
Sample capacity	120g
Measurement modes	Automatic or Timed ending modes, Standard, Rapid, Slow and Step drying modes, Predictive Measuring mode
Drying heater	Mid-wave infrared quartz heater
Temperature range	30 to 200°C (by 1°C increments)
Digital output	Complete test data including instrument settings can be output. Optional electronic printer prints the data in tabular or graphical style. Excel® Spread Sheets can receive the data without communication software (WindowsDirect).
Dimensions	220W X 415D X 190H (mm)
Weight	4.5kg
Operational temperature and humidity range	5 to 40°C, 85% RH or lower
Power requirements	AC100 to 127 / 220 to 240V, 640W maximum
Stored procedures	10
Standard accessories	Sample pan 2pcs, Sample pan handler 2pcs, Aluminum sheet 20pcs, Spoon, Spatula
Optional accessories	Temperature calibration kit, Electronic printer, RS-232C Cable
Consumables	Aluminum sheet 500pcs, Printer paper for optional electronic printer

Optional Accessories

Temperature calibration kit

The temperature at the sample position can be directly measured.

Electronic printer

Measurements can be printed out in tabular or graphical style.

Read instruction manual and understand before use of this instrument.

- Use this instrument for measurements in which water vaporizes from the sample under heating.
- The temperature of the heater installed in this instrument becomes higher than the set heating temperature for the sample.
- Any sample that is explosive, inflammable or may cause hazardous reaction under heating must not be measured with this instrument.

Application Balances

UniBloc Electronic Moisture Balance

New MOC63u

Easy operation -Automatic starting mode-

Easy-to-operate software and key layout. Automatic starting mode saves measurement time.

Backlight display

Illuminated display provides comfortable display visibility in all settings.

Compact design

MOC63u is one of the most compact instruments in its class. Width is only 202 (mm).

Data management -WindowsDirect-

The measurement conditions and data can be stored in MOC63u. Data IO for printer, RS-232C and USB connection for PC are available as standard. Send balance data to Excel or other Windows applications.

Data transfer port of MOC63u

Measurement data

With WindowsDirect

For food industry

Measurement data of soft flour

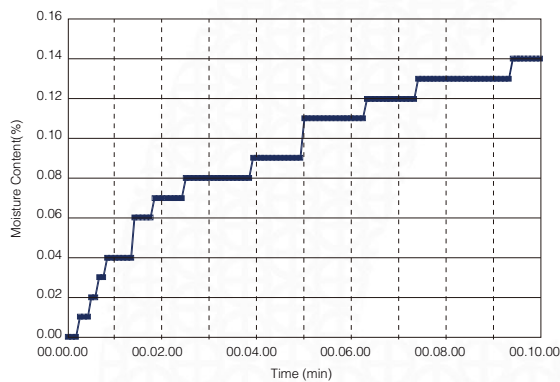

Soft flour

For chemical industry

Measurement data of resin pellet

Resin pellet

Large pan size

Large sample pan: ϕ 95mm diameter

Long lifetime halogen heater

Halogen heater promises you quick and accurate measurement.

Maintenance

It's very easy to clean up and replace the halogen lamp.

Easy to remove

Measurement modes of MOC63u

Choose the right measuring mode for your application.

Ending modes

Automatic ending mode

Automatically ends measurement when moisture loss over the previous 30 seconds becomes smaller than specified percentage.

Timed ending mode

Automatically ends measurement when the specified amount of time has elapsed.

Alternate drying modes

Rapid drying mode

First dries with the highest temperature for the specified period, then shifts to the specified temperature shortening

Slow drying mode

Gently heats samples that might solidify at the surface or samples that reduce under

Step drying mode

Allows step-by-step changes in drying conditions. This feature is useful when measuring samples that contain a large amount of water.

Starting mode

Automatic starting mode

Starts measurement immediately after closing the lid. It will save time in repeated measurement.

Capacity	Max	60 g
	Min	0.02g

Application Balances, Optional Accessories

SMK Specific Gravity Measurement Kits

Simple specific gravity meters based on precision balances.

Combine your Shimadzu balance with a specific gravity measurement kit for handy specific gravity measurements. Software for specific gravity measurement is pre-installed in all AUW-D / AUW / AUX / AUY, AW / AX / AY, UW / UX, and ELB Series.

Order one of the balances and the corresponding specific gravity measurement kit.

Liquid density can also be measured with a sinker (except for ELB Series).

SMK-101

SMK-401

Model	Balance Series	Reduced Capacity (approx.)	Sample Phase	
			Solid	Liquid
SMK-401	AUW-D/AUW/AUX/AUY	0g	●	●
SMK-301	AW/AX/AY	0g	●	●
SMK-101	UW/UX (Capacity 2200g or more)	100g	●	●
SMK-102	UW/UX (Capacity 420g-820g)	270g	●	●
SMK-201	ELB (Capacity 600g-6000g)	200g	●	

A sinker is additionally needed for liquid density measurement.

Animal Balances

UW*

UX*

BW-K*

BX-K*

* When animal weighing mode is not used, all the functions indicated on p.14 and p.18 are available.

Electronic Balances for Weighing Animals

UW Series

BW-K plus Medium-size Animal Bucket

BW-K plus Large Animal Bucket

Dedicated software functions quick and reliable results in live animal weighing applications

Upon removing the weighed animal, the balance is automatically reset to zero regardless of deposited material.

Display response and stability can be optimized for the level of animal movement conditions.

Model	Balance Series	Reduced Capacity (approx.)
Small Animal Bucket set	UW/UX (Capacity 2200g or more)	Bottom 110dia, Top 200dia, Height 130
Medium-size Animal Bucket set *1	BW-K	Bottom 305 X 215, Top 377 X 245, Height 215
	BX-K	
Large Animal Bucket set *2	BW-K (Capacity 22kg or more)	Bottom 335 X 245, Top 445 X 395, Height 345
	BX-K (Capacity 22kg or more)	

*1 Capacity is reduced about 2kg

*2 Capacity is reduced about 6kg

Electronic Printer

EP-80

EP-90

EP-80

EP-90

Dimensions

Common features for EP-80 and EP-90

- Simple connection to balances using the cable provided.
- Uses normal paper, suitable for long-term storage compatible with GLP/GMP/ISO (dot impact method).
- Operation can be powered by AC adapter or dry batteries
- Hassle-free long-use printer paper rolls (8000 lines of printing with one roll).
- High-speed printing at approx. 3 lines/sec (printer mechanism performance).
- Installed with statistical calculation function as standard.
- Can be used simultaneously with Shimadzu's unique WindowsDirect function (output to computer).

EP-90 Capable of Attaching Sample/ID Numbers, Date and Time to Each Measurement Result

- Equipped with keyboard, capable of defining ID number (fixed input number), and sample number (number input and then increased automatically with each printing).
- Printing of date and time (when connected to an electronic balance with a built-in clock) can be controlled from the printer.
- Multiplication and comparator functionality built-in.

Static Remover

STABLO-EX

Shimadzu's unique
2-WAY ionizer

Hand-held / On stand

Secure static removal

The excellent ion polarity balance achieved by the alternating method ensures :

- No inverse charging
- Wide angle static removal
- High performance maintained over a long period of use

Space saving design

Compact main unit requires minimal space. Holder height and angle are adjustable.

Quickly discharge container or bulk samples with fan ON.

For powdered samples, fan can be turned OFF.

As a handheld unit
